4913.0.55.001 - Microdata: Pregnancy and Employment Transitions, Expanded CURF, Australia, Nov 2005

Previous ISSUE Released at 11:30 AM (CANBERRA TIME) 06/11/2006 First Issue

The CURF is only available through the Remote Access Data Laboratory (RADL).

An expanded Confidentialised Unit Record File (CURF) from the 2005 Pregnancy and Employment Transitions Survey.

The survey collects statistics about the experiences of women with a child aged under 2 years, including some aspects of women's working experiences while pregnant and after returning to paid work, as well as the use of leave by women and their partners following the birth of a child.

Users are able to tabulate, manipulate and analyse data to their individual specifications.

Steps to confidentialise the dataset are taken to ensure integrity of data, optimise its content and maintain confidentiality of respondents. They include removing any information that might uniquely identify an individual, reducing the level of detail for some items and collapsing some categories.

The CURF includes metadata files and documentation to enable users to read the data into SAS or SPSS software. Users can then analyse the data using any method supported by SAS or SPSS, including cross tabulation and correlative analyses.

The CURF is only available through the Remote Access Data Laboratory (RADL). A Technical manual explaining data content, technical details and conditions of use is available on the ABS web site and via the 'Information by' link on the RADL home page.

For more information, see [Access to ABS CURFs from the Services we provide](#) page.
